

INDUSTRY PARTNERS  
AUSTRALIA

• IPA Collective

*A Community of Professionals Improving the Future of Australian Industry*

## About the Program

With over 30 years of experience in industry networking and event management nationally, we have a significant number of companies and senior leaders looking for the right expertise and experience to help them find solutions. Our IPA Collective Industry Specialists are diverse, but all have a common thread in delivering high-quality products and services; most are regarded as the best in their field.

After discussions and research through industry, the program was successfully launched in 2023. This enhances our capability to achieve our vision: to create a community of professionals improving the future of Australian industry, collectively making a difference.

## CONNECT | SUPPORT | GROWTH

### What people are saying

"As an IPA Collective member, it's heartening to know that a group exists that only wants the best for all Australian manufacturers. With collaborative support, opportunities to partner with like-minded and values-aligned businesses, and the ability to access the qualified IPA manufacturing membership, it's a unique ecosystem that supports all parties. If you're serious about helping rejuvenate Australian manufacturing, want to grow the sector and support those who need what you do. The IPA Collective is the group and network for you."

*John Broadbent, Realise Potential*

We have been with IPA Collective for three years. IPA Collective has given Efficiency Works the opportunity to network with some of Australia's blue-chip companies. Some of which are now clients. Aside from the new business, IPA Collective has introduced us to other Specialist partners, with whom we have learned and formed close relationships. IPA Collective is a great concept, and Efficiency Works is humbled to be an IPA Collective Industry Specialist.

*Robert Briffa, Efficiency Works*

# Specialist Event Portfolio

The IPA Collective hosts a dynamic array of events designed to cater to our specialists' diverse interests and needs. These events foster relationships, deepen engagement, and facilitate continuous learning.

The event lineup is carefully curated to ensure specialists can access a well-rounded range of opportunities. Whether it's through sharing expertise, engaging in localised networking, honing professional skills, or gaining national awareness, these events are designed to enrich the experiences of our specialists and contribute to their ongoing growth and success.
